

History of AGLUKON

AGLUKON Spezialduenger GmbH & Co.KG, a former subsidiary of AgrEvo Hoechst Schering AG, is based in Dusseldorf (Germany). The company has a long history. It was set up in 1928 and its longevity is mainly due to its long-term vision for sustainable product development and production as well as for the trusty co-operation with its partners. The company produces and distributes high quality specialty fertilizers such as suspension fertilizers, liquid fertilizers, controlled coated release fertilizers, etc under very well-known brands such as **WUXAL**, **COMPLESAL**, **PLANTACOTE**, **AZOLON**, etc.

AGLUKON was the first company to develop the suspension fertilizers and the first formulated liquid fertilizer. **AGLUKON** also patented its own coating system for controlled coated release fertilizers. Its excellent quality, know-how, trade marks, service and sales to more than 65 countries helped **AGLUKON** to gain a worldwide leading position in the specialty fertilizer market.
